JOURNAL OF STATISTICAL PHYSICS

Vol. 66, Nos. 1/2 January 1992

CONTENTS

ARTICLES

Phase Diagram of a Random Tiling Quasicrystal 1
Weixiong Li, Hyunggyu Park, and Michael Widom

Pinning of an Interface by a Weak Potential 71
François Dunlop, Jacques Magnen, Vincent Rivasseau, and Philippe Roche

On Scaling Properties of Cluster Distributions in Ising Models 99
C. Ruge and F. Wagner

Monte Carlo Study of the Effect of Perturbations on Critical Droplets 117
L. Monette, W. Klein, and M. Zuckermann

Critical Behavior of the Specific Heat for Pure and Site-Diluted Cubic Ising Systems 133
A. Weyersberg, T. Holey, and M. Fähnle

Random Infinite-Volume Gibbs States for the Curie–Weiss Random Field Ising Model 139
J. M. G. Amaro de Matos, A. E. Patrick, and V. A. Zagrebnov

Correlations in the Kosterlitz–Thouless Phase of the Two-Dimensional Coulomb Gas 165
A. Alastuey and F. Cornu

Partition Function Zeros for the One-Dimensional Ordered Plasma in Dirichlet Boundary Conditions 233
J. Roumeliotis and E. R. Smith

On the Analytical Solution of the Ornstein–Zernike Equation with Yukawa Closure 249
L. Blum, F. Vericat, and J. N. Herrera-Pacheco

Random Sequential Adsorption on a Ladder 263
Y. Fan and J. K. Percus

Isotropic Majority-Vote Model on a Square Lattice 273
M. J. de Oliveira

Higher-Order Implicit Strong Numerical Schemes for Stochastic Differential Equations 283
P. E. Kloeden and E. Platen

Statistical Properties of Two-Dimensional Periodic Lorentz Gas with Infinite Horizon 315
P. M. Bleher

Anomalous Diffusion in a Random Velocity Field 375
B. Gaveau and L. S. Schulman

Enumeration of Limit Cycles in Noncylindrical Cellular Automata 385
C. J. Twining and P.-M. Binder

Kinetic Limits of the HPP Cellular Automaton 403
Anna De Masi, Raffaele Esposito, and Errico Presutti

Thermal Cellular Automata Fluids 465
M. H. Ernst and Shankar P. Das

A Multi-Length-Scale Theory of the Anomalous Mixing-Length Growth for Tracer Flow in Heterogeneous Porous Media 485
Qiang Zhang

Maps of Intervals with Indifferent Fixed Points: Thermodynamic Formalism and Phase Transitions 503
Thomas Prellberg and Joseph Slawny

Meromorphic Structure of the Mellin Transforms and Short-Distance Behavior of Correlation Integrals 515
E. Orlandini, M. C. Tesi, and G. Turchetti

On the Approximation of Invariant Measures 535
Fern Y. Hunt and Walter M. Miller

On Information-Processing Abilities of Chaotic Dynamical Systems 549
Nolan W. Evans, Reinhard Illner, and Hon C. Kwan

Stretched-Exponential Decay Laws of General Defect Diffusion Models 563
H. M. Ito, Y. Ogura, and M. Tomisaki

Fluctuations in a Lévy Flight Gas 583
H. C. Fogedby, T. Bohr, and H. J. Jensen

Short-Time Behavior of the Vibrational-Energy–Time Correlation Function for a One-Dimensional Model of Diatomic Molecules 595
Alessandro Monge and E. G. D. Cohen

H-Theorem for a Linear Kinetic Theory 607
J. Blawzdziewicz, B. Cichocki, and H. van Beijeren

SHORT COMMUNICATIONS

Rotation of Magnetization in Unison and Langevin Equations for a Large Spin 635
Ivo Klik

A Reformulation of the Feynman Chessboard Model 647
G. N. Ord

Distribution of Cyclic Species in Network Formation: Microscopic Theory of Branching Process in A_g–R–B_{f-g} Model 661
Kazumi Suematsu and Tosihiko Okamoto

Counting Lattice Animals: A Parallel Attack 669
Stephan Mertens and Markus E. Lautenbacher

Cluster Size Distribution at Criticality 679
D. C. Rapaport

DEPARTMENTS

Book Review: *Fractal Growth Phenomena* 683
Fereydoon Family

Future Contributions to *Journal of Statistical Physics* 687

JOURNAL OF STATISTICAL PHYSICS

Vol. 66, Nos. 3/4 February 1992

CONTENTS

ARTICLES

Quasipotentials for Simple Noisy Maps with Complicated Dynamics 689
Andreas Hamm and Robert Graham

Phase Transitions in Thermodynamics of a Local Lyapunov Exponent for Fully-Developed Chaotic Systems 727
H. Shigematsu

Computing the Topological Entropy of Maps of the Interval with Three Monotone Pieces 755
Louis Block and James Keesling

On the Multifractal Analysis of Measures 775
G. Brown, G. Michon, and J. Peyrière

Dynamical System Related to Quasiperiodic Schrödinger Equations in One Dimension 791
Mahito Kohmoto

Distribution of Cyclic Species in Network Formation: Microscopic Theory of Branching Processes 797
Kazumi Suematsu and Tosihiko Okamoto

A Mean-Field Limit for a Class of Queueing Networks 803
F. Baccelli, F. I. Karpelevich, M. Ya. Kelbert, A. A. Puhalskii, A. N. Rybko, and Yu. M. Suhov

Instantons in Spherical Model Thermodynamics 827
S. B. Rutkevich

Dynamics of Mean-Field Spin Models from Basic Results in Abstract Differential Equations 849
F. Bagarello and G. Morchio

Critical Exponents of Random Ising-Like Systems in General Dimensions 867
Yu. Holovatch and M. Shpot

Evaluation and Comparison of Critical Lines for Various Models of Gas–Liquid Binary Systems 885
Mustafa Keskin, Mustafa Gencaslan, and Paul H. E. Meijer

Effective-Field Theory of Spin Glasses and the Coherent-Anomaly Method. II. Double-Cluster Approximation 897
Naomichi Hatano and Masuo Suzuki

Ground States of the Spinless Falicov–Kimball Model. II 913
C. Gruber, J. Jedrzejewski, and P. Lemberger

Ground States of VBS Models on Cayley Trees 939
M. Fannes, B. Nachtergaele, and R. F. Werner

Microcanonical Variational Transition-State Theory for Reaction Rates in Dissipative Systems 975
Susan C. Tucker and Eli Pollak

Global Existence Proof for Relativistic Boltzmann Equation 991
Marek Dudyński and Maria L. Ekiel-Jeżewska

On the Spectrum of the Linear Boltzmann Operator 1003
Russell K. Standish

A Convergence Proof for Bird's Direct Simulation Monte Carlo Method for the Boltzmann Equation 1011
Wolfgang Wagner

Exact Solutions of the Boltzmann Equation in the VHP Model with Removal Interaction 1045
F. Schürrer and M. Schaler

Velocity Spectrum for Non-Markovian Brownian Motion in a Periodic Potential 1059
A. Igarashi, P. V. E. McClintock, and N. G. Stocks

Phase Separation Dynamics in Driven Diffusive Systems 1071
C. Yeung, T. Rogers, A. Hernandez-Machado, and David Jasnow

Universality Class of Interface Growth with Reflections Symmetry 1089
P. Devillard and H. Spohn

Overcoming Artificial Spatial Correlations in Simulations of Superstructure Domain Growth with Parallel Monte Carlo Algorithms 1101
W. Schleier, G. Besold, and K. Heinz

A Note on Differentiability of the Cluster Density for Independent Percolation in High Dimensions 1123
Wei-Shih Yang and Yu Zhang

SHORT COMMUNICATIONS

New Renormalization Procedure for Eliminating Redundant Operators 1139
Yu. M. Ivanchenko, A. A. Lisyansky, and A. A. Filippov

How Should One Define a (Weak) Crystal? 1147
A. C. D. van Enter and Jacek Miękisz

A Stochastic Method to Determine the Shape of a Drop on a Wall 1155
S. S. Manna, H. J. Herrmann, and D. P. Landau

Microscopic-Based Fluid Flow Invasion Simulations 1165
W. G. Wilson and W. G. Laidlaw

An Efficient Hydrodynamic Cellular Automata for Simulating Fluids with Large Viscosities 1177
G. A. Kohring

DEPARTMENTS

Book Review: *Chaotic Behaviour of Deterministic Dissipative Systems*
Jaume Masoliver 1185

Future Contributions to *Journal of Statistical Physics* 1187

JOURNAL OF STATISTICAL PHYSICS

Vol. 66, Nos. 5/6 March 1992

CONTENTS

ARTICLES

Effect of Disorder on Two-Dimensional Wetting 1189
B. Derrida, V. Hakim, and J. Vannimenus

Existence of Several Surface-Reconstructed Phases in a Two-Dimensional Lattice Model 1215
Dale A. Huckaby and Franz S. Rys

Microcanonical Density Functionals for Critical Systems: An Exact One-Dimensional Example 1225
Lev V. Mikheev and Michael E. Fisher

Dynamical Analysis of Low-Temperature Monte Carlo Cluster Algorithms 1245
Fabio Martinelli

A Renormalization Group Analysis of Correlation Functions for the Dipole Gas 1277
J. Dimock and T. R. Hurd

Smooth Phase in the One-Dimensional Discrete Gaussian Model with $1/(i-j)^2$ Interactions at Inverse Temperature $\beta > 1$ 1319
Domingos H. U. Marchetti

Asymptotic Behavior of Correlation Functions for Electric Potential and Field Fluctuations in a Classical One-Component Plasma 1343
L. G. Suttorp

Uniform Upper Bounds (and Thermodynamic Limit) for the Correlation Functions of Symmetric Coulomb-Type Systems 1359
Michael K.-H. Kiessling

Intermittency from Maximum Entropy Distribution 1383
Robert Englman

Determination of Fixed Points and Shift Cycles for Nearest Neighbor Cellular Automata 1397
Burton Voorhees

The Attractor–Basin Portrait of a Cellular Automaton 1415
James E. Hanson and James P. Crutchfield

A Multidimensional Continued Fraction and Some of Its Statistical Properties 1463
P. R. Baldwin

A Convergence Exponent for Multidimensional Continued-Fraction Algorithms 1507
P. R. Baldwin

A Long-Time Tail for Random Walk in Random Scenery 1527
F. den Hollander, J. Naudts, and P. Scheunders

Chemical Reactions as Dynamical Systems on the Interval 1557
L. Rondoni and R. F. Streater

Half-Range Completeness for the Fokker–Planck Equation with an External Force 1575
C. Cercignani and C. Sgarra

Invariance Principle for the Stochastic Lorentz Lattice Gas 1583
F. den Hollander, J. Naudts, and F. Redig

822/69/5-6-18

The Localization Properties of a Random Steady Flow on a Lattice 1599
Alexander Figotin

Natural Boundaries for Area-Preserving Twist Maps 1613
A. Berretti, A. Celletti, L. Chierchia, and C. Falcolini

A Renormalization Group Explanation of Numerical Observations of Analyticity Domains 1631
Rafael de la Llave

SHORT COMMUNICATIONS

Landslides on Sandpiles: Some Moment Relations in One Dimension 1635
Joachim Krug

A Lower Bound for the Memory Capacity in the Potts–Hopfield Model 1643
Pablo A. Ferrari, Servet Martinez, and Pierre Picco

Accurate Monte Carlo Tests of the Stochastic Ginzburg–Landau Model with Multiplicative Colored Noise 1653
Jingdong Bao, Yizhong Zhuo, and Xizhen Wu

Molecular Dynamics Calculations for the Modified *xy* Model 1659
Peter Litz, Stefan Langenbach, and Alfred Hüller

Renormalization Group Equations in Local Approximations 1667
A. A. Lisyansky, Yu. M. Ivanchenko, and A. A. Filippov

First Passage Time Distribution in an Oscillating Field 1675
S. V. G. Menon

DEPARTMENTS

Book Review: *Statistical Mechanics of Neural Networks* 1683
C. Van den Broeck

Program: Statistical Mechanics at the 45th Parallel 1685

Future Contributions to *Journal of Statistical Physics* 1691

ARTICLES

Directed Paths on Percolation Clusters 1
Leon Balents and Mehran Kardar

Random Walks in a Random Field of Decaying Traps 13
Frank den Hollander and Kurt E. Shuler

Resonance Trapping in Dissipative and Antidissipative Systems: An Ergodic Approach 33
Gershon Wolansky

Join-and-Cut Algorithm for Self-Avoiding Walks with Variable Length and Free Endpoints 65
Sergio Caracciolo, Andrea Pelissetto, and Alan D. Sokal

Current Distributions in a Two-Dimensional Random-Resistor Network 113
E. Duering, R. Blumenfeld, D. J. Bergman, A. Aharony, and M. Murat

Eight-Vertex Model: Anisotropic Interfacial Tension and Equilibrium Crystal Shape 123
Masafumi Fujimoto

The Asymmetric Six-Vertex Model 155
I. M. Nolden

Turbulence Spectra 203
Nadine Aubry, Régis Guyonnet, and Ricardo Lima

Hydrodynamic Limits for the Boltzmann Process 229
C. Costantini and R. Marra

Ergodic Properties of the Discontinuous Sawtooth Map 251
S. Vaienti

Projection Operator Approach to the Thermodynamic Formalism of Dynamical Systems 271
Wolfram Just

Recurrence Properties of Lorentz Lattice Gas Cellular Automata 289
L. A. Bunimovich and S. E. Troubetzkoy

Generalized Voter Models 303
T. S. Mountford

Nonlinear Stability of Incoherence and Collective Synchronization in a Population of Coupled Oscillators 313
Luis L. Bonilla, John C. Neu, and Renato Spigler

Exact Time Correlation Function for a Nonlinearly Coupled Vibrational System 331
H. Keith McDowell and A. M. Clogston

The Influence of Temperature Gradients on the Kinetic Boundary Layer Problem for a Condensing Droplet 347
M. E. Widder and U. M. Titulaer

Order and Disorder in the Approach to Equilibrium of a Classical Gas 369
D. J. Driebe and T. Petrosky

Thermodynamics of a Dense Self-Avoiding Walk with Contact Interactions 395
A. M. Nemirovsky, Jacek Dudowicz, and Karl F. Freed

SHORT COMMUNICATION

Growth of Correlation in the Hopfield Model 413
P. Sen

CONTENTS

This special issue contains papers dealing with Quantum Chaos

ARTICLES

Preface: What is Quantum Chaos? 1
Joel L. Lebowitz and Peter J. Reynolds

Program 5

The Van Vleck Formula, Maslov Theory, and Phase Space Geometry 7
Robert G. Littlejohn

Closed Orbits and Semiclassical Wavefunctions in Two-Dimensional Hamiltonian Systems 51
J.-M. Mao, J. Shaw, and J. B. Delos

Semiclassical Wavefunctions of Nonintegrable Systems and Localization on Periodic Orbits 97
D. C. Meredith

Accuracy of Semiclassical Dynamics in the Presence of Chaos 131
Patrick W. O'Connor, Steven Tomsovic, and Eric J. Heller

The Semiclassical Limit of a Quantum Fermi Accelerator 153
G. Chu and Jorge V. José

Renormalization Group Study of Quantum Fluctuations near Classical Critical Points of Hamiltonian Systems 175
Géza Györgyi, Robert Graham, and R. E. Prange

Capture by Stabilized Continuum: Classical and Quantum Aspects 189
Zi-Min Lu, Michel Vallières, and Jian-Min Yuan

Quantum Qualitative Dynamics 207
Craig C. Martens

Microwave Experiments on Chaotic Billiards 239
S. Sridhar, D. Hogenboom, and Balam A. Willemsen

Quantum Chaos, Classical Randomness, and Bohmian Mechanics 259
Detlef Dürr, Sheldon Goldstein, and Nino Zanghí

Floquet Spectrum for Two-Level Systems in Quasiperiodic Time-Dependent Fields 271
P. M. Blekher, H. R. Jauslin, and J. L. Lebowitz

Quantum Chaos 311
R. Blümel and J. B. Mehl

Chaos and Quantum Irreversibility 321
Roberto Roncaglia, Luca Bonci, Paolo Grigolini, and Bruce J. West

Future Contributions to *Journal of Statistical Physics* 345

JOURNAL OF STATISTICAL PHYSICS

Vol. 68, Nos. 3/4 August 1992

CONTENTS

This special issue contains papers presented at the Advanced Research Workshop on Lattice Gas Automata and is dedicated to Michel Hénon on the occasion of his 60th birthday.

ARTICLES

Foreword 347
Jean Pierre Boon

Program 351

Implementation of the FCHC Lattice Gas Model on the Connection Machine 353
M. Hénon

Lattice Boltzmann Computational Fluid Dynamics in Three Dimensions 379
Shiyi Chen, Zheng Wang, Xiaowen Shan, and Gary D. Doolen

The Lattice Boltzmann Equation on Irregular Lattices 401
Francesca Nannelli and Sauro Succi

Lattice-Gas and Lattice-Boltzmann Models of Miscible Fluids 409
Richard Holme and Daniel H. Rothman

Biased Lattice Gases with Correlated Equilibrium States 431
H. J. Bussemaker and M. H. Ernst

Global Invariants and Equilibrium States in Lattice Gases 457
D. Bernardin

Phase Transitions in a Probabilistic Cellular Automaton: Growth Kinetics and Critical Properties 497
F. J. Alexander, I. Edrei, P. L. Garrido, and J. L. Lebowitz

Lattice Gas Simulations of Osmosis 515
E. G. Flekkøy, J. Feder, and T. Jøssang

Magnetohydrodynamics Computations with Lattice Gas Automata 533
Shiyi Chen, Daniel O. Martínez, W. H. Matthaeus, and Hudong Chen

Reynolds Stresses in a Lattice Gas 557
F. Hayot

Diffusion Simulation with a Deterministic One-Dimensional Lattice-Gas Model 563
Y. H. Qian, D. d'Humieres, and P. Lallemand

Lattice Gases and Exactly Solvable Models 575
Brosl Hasslacher and David A. Meyer

The Lattice Boltzmann Phononic Lattice Solid 591
Peter Mora

† A Stochastic Lattice Gas for Burgers' Equation: A Practical Study
Leesa Brieger and Ernesto Bonomi

Bibliography 611

Future Contributions to *Journal of Statistical Physics* 671

† To appear in a later issue.

JOURNAL OF STATISTICAL PHYSICS

Vol. 68, Nos. 5/6 September 1992

CONTENTS

ARTICLES

Diffusion, Effusion, and Chaotic Scattering: An Exactly Solvable Liouvillian Dynamics 673
Pierre Gaspard

Structure Functions in a Model of Turbulent Energy Dissipation 749
Jan Finjord

Shock Fluctuations in the Two-Dimensional Asymmetric Simple Exclusion Process 761
Francis J. Alexander, Zheming Cheng, Steven A. Janowsky, and Joel L. Lebowitz

Multiple Phases and Return to Equilibrium 787
A. L. Carey and L. R. Hume

Phenomenology of Nonlocal Cellular Automata 829
Wentian Li

Survival Probabilities for Random Walks on Lattices with Randomly Distributed Traps 883
Edoardo Milotti

Time-Dependent Thermodynamic Properties of the Ising Model from Damage Spreading 895
Sharon C. Glotzer, Peter H. Poole, and Naeem Jan

A Vectorizable Random Lattice 911
C. Moukarzel and H. J. Herrmann

Annealed n-Vector p-Spin Model 925
T. Taucher and N. E. Frankel

The Thermodynamic Limit of the q-State Potts–Hopfield Model with Infinitely Many Patterns 977
V. Gayrard

Modulated Phases and Upsilon Points in a Spin Model with Helical Ordering 1013
Kazuo Sasaki

The Classical Fluid of Associating Hard Rods in an External Field 1037
E. Kierlik and M. L. Rosinberg

Oscillation of the Radial Distribution Function 1065
N. S. Gonchar and A. B. Rudyk

Classical Coulomb Fluids in a Confined Geometry 1089
B. Jancovici and G. Manificat

Quenched Disorder in a Hierarchical Coulomb Gas Model 1105
David Munton

SHORT COMMUNICATIONS

Time-Series Analysis of a Collective Variable in High-Dimensional Cellular Automata 1127
P.-M. Binder, B. Buck, and V. A. Macaulay

The Langevin Dynamics of Vibrated Powders 1131
Anita Mehta, R. J. Needs, and Sushanta Dattagupta

NOTE

Natural Frequencies of the Classical Two-Spin *XXZ* System 1143
S. Gade and E. Gade III

Future Contributions to *Journal of Statistical Physics* 1147

T. Gobron

A Hopf-Like Equation and Perturbation Theory for Differential Delay Equations 1025
Jérôme Losson and Michael C. Mackey

Frenkel–Kontorova Model with Toda Interactions 1047
Bin Lin and Bambi Hu

Monte Carlo Calculations of the Conformal Charge 1069
Xidi Wang and George A. Baker, Jr.

Monte Carlo Simulation of the Two-Dimensional Planar Model 1097
Chris Bowen, D. L. Hunter, and Naeem Jan

SHORT COMMUNICATIONS

Comment on Noise and Bifurcations 1115
H. Calisto, E. Cerda, and E. Tirapegui

Note on the Hydrodynamic Eigenmodes of Couette Flow 1123
Leh-Hun Gwa and E. G. D. Cohen

The Kink of Cellular Automaton Rule 18 Performs a Random Walk 1131
Kari Eloranta and Esa Nummelin

Culture and Evolution on Populations of Neural Networks 1137
T. J. P. Penna and P. M. C. de Oliveira

DEPARTMENTS

Book Review: *Finite Size Scaling and Numerical Simulation of Statistical Systems* 1151
Dennis C. Rapaport

Book Review: *Nonlinear Dynamics and Chaos* 1153
Moshe Gitterman

Book Review: *A Survey of Nonlinear Dynamics ("Chaos theory")* 1155
Moshe Gitterman

Book Review: *From Microphysics to Macrophysics. Methods and Applications of Statistical Physics* 1157
Moshe Gitterman

Author Index for *Journal of Statistical Physics* (1992) 1159

Future Contributions to *Journal of Statistical Physics* 1175
